

Keeping You Connected with Important Local Issues

Threatening Sea Level Rise Has Arrived on the North Fork

- “Shoreline hardening”, by adding manmade seawalls and bulkheads, may not be the right solution
- Now experts say there’s a better way that could even reverse effects on the coastline and improve water quality
- Come hear about the new approach from experts about “The Living Shoreline”

The Town of Southold has teamed up with Suffolk County, Cornell Cooperative Extension, and Peconic Estuary Program.

The project will see a combination of native plants, sea grasses, natural materials like rocks and wood, and ribbed mussels planted at the facility as part of an ongoing effort to stabilize the waterfront.

Save the date!

Saturday, March 30, 2019

9:00 – 11:00 AM

American Legion Hall

51655 Main Rd. Southold

FREE session is open to all.

Coffee and refreshments

Will be served
